Checking VM Compliance with SSM

David O'Brien

MICROSOFT MVP, SENIOR DEVOPS CONSULTANT

@david_obrien   https://david-obrien.net

Module Overview

Configuration Compliance types

Automatically remediate non-compliant targets

Configuration Compliance Types

Patch Compliance

- Do managed instances have patches installed or not

Association Compliance

- Are managed instances in the state I want them to be in

Custom Compliance

- Custom metadata on managed instances

Automatic Remediation

Instances that are non-compliant will report as such

CloudWatch can trigger on this event another event

- e.g. rerun a Run Command

Demo

Check Instances' Compliance State

Module Summary

Different types of SSM Configuration Compliance

How to remediate non-compliant instances
